

OPEN INVITATION TO SCHOOLS WITH CURRICULUM THAT INCLUDES TEACHING SAFE PATIENT HANDLING

We would like to offer schools who teach patient transfers to their students, the opportunity to receive a complimentary Slipp® transfer device free of charge! With today's economy the way it is, we realize that schools have limited budgets to work with as far as acquiring new equipment for their teaching labs. As a manufacturer, we believe in education and giving something back, and we are always looking for ways to help students increase their knowledge base. Our feeling is the more the students are aware of the different types of transfer equipment that are available to help them do their job better and safer, the better these students will be when they enter the workforce. The Slipp® is currently used in over 2,500 healthcare facilities nationwide and is extremely helpful in patient transfers and repositioning, resulting in reduced back and shoulder injuries among employees.

If your school would like to take us up on our offer to receive the complimentary Slipp® patient transfer device, simply contact us at **1-800-356-6911**, fax us at **(217) 423-7282**, or e-mail us at **gwslipp@aol.com** and we will be happy to send the Slipp® unit for use in your teaching facility. Each unit does come complete with an 8 minute in-service DVD, written instructions, and carrying case. We look forward to hearing from you and keep up the good work!

Sincerely,

Grant Wright
President
